

Pankaj Gabale

302/166 Wellington Pde, East Melbourne, VIC, 3000 | Ph.+61452643825 | E: gabalepankaj@gmail.com

LinkedIn Profile: <https://www.linkedin.com/in/pankaj-gabale/>

Career objective

Technical, enthusiastic and passionate data scientist with strong attention to details, analytical and communication skills. Currently, seeking full time opportunities in analytics and data science field.

Education

MASTER IN ANALYTICS | RMIT, MELBOURNE | FEB'18- DEC' 18

Related coursework: Statistical modeling, Bayesian statistics, Machine learning, R, BI, Google Cloud platform.

BACHELOR IN TECHNOLOGY | COEP, PUNE, INDIA | JUN'11- JUL'15

Related coursework: Programming fundamentals, SQL, calculus, linear algebra, operations research.

Experience

DATA SCIENTIST (INTERN, FULL STACK) | ANZ INSTITUTIONAL, MELBORNE | MAR'19- ONGOING

Key Responsibilities

- Refactoring existing data pipeline for retail transaction data from data lake (BigQuery) to building workloads on Kubernetes engine deployed on Gitlab's CI CD pipeline for automated pipeline executions.
- Improved pipeline cycle by modifying the existing queries and response models for retail transaction data (20%-time reduction in end to end pipeline executions after API and response model improvements).
- Identified and solved key issues in loyalty calculation queries and user management and insight features for demographic level analysis improving SLI/SLO responses.
- Designed data model for payable finance features integrating legacy (Oracle) and new database (Teradata) and backend design complying with data governance policies.
- Created a payable finance modeler POC for maximizing net working capital benefits for buyers and suppliers.
- Design POC React-app for DAOs in Ethereum blockchain for monitoring and approval of smart contracts for one entity.
- **Backend:** python, C#, BigQuery, PostgreSQL. **Frontend:** React

VACATIONER CONSULTANT| ERNST AND YOUNG, MELBORNE | NOV'18-(CONTRACT EXP. 8TH FEB 19)

Key Responsibilities

- Work with cross-functional teams to deliver client solutions in data strategies, data analytics and decision making.
- Prepare dashboards and reports (Power BI and Tableau) with legacy client data and database systems.
- Client services in managing Azure based cloud service for financial data and building financial insights.
- Work with senior team leaders in showcasing EY service line deliveries and proposals for data driven solutions.

DATA ANALYSIS INSTRUCTOR| RMIT UNIVERSITY, MELBORNE | SEP'18-NOV'18

Key Responsibilities

- Design and conduct Excel education skills for staff in academic and engineering services in RMIT connect.
- Use student systems to create new data for demos and educate staff on efficient use of Excel to solve problems.
- Create a local database for the current system of student data and using data as a platform for developing macros.

QA ENGINEER | EQ TECHNOLOGIC, INDIA | JUN'15- JAN'18

Key Responsibilities

- Generated Business Intelligence reports with data from DB plugins (Oracle, MS-Access) and Web services.
 - Performed Data migration and integration with different DB plugins with data types RS, XML-XSD, JSON, and SOAP.
 - Worked on Reverse Invoke client for secure data transmission via SOAP and REST web services.
 - Worked on data transactions with HTTP and JMS transport systems (WebLogic and apache).
 - Developed a web app to automate and validate issue cycles in software testing using J-Panel, JavaScript and HTML.
 - Worked in big data transaction handling with data transaction queues, boundaries and procedures.
-

Datathon and Projects

MELBOURNE DATATHON | DATA SCIENCE, MELBOURNE| JUL'18- SEP'18

- Sampled data from 1.88 billion transactions to predict future congestion stops, analyzing traffic patterns
- A Neural net algorithm, including transit time, distance and population as new variables using google map API.
- Created a [web app](#) with R Shiny, integrating High charter, leaflet and Bootstrap plugins for monitoring traffic at stops
- Proposed benefit model for solutions on improving STS ratio, inclusion of Express trams and new services for PTV

Achievement: 3rd prize in student category [[Report](#)]

BARD RESEARCH VOLUNTEER | MONASH UNIVERSITY| JUL'18- SEP'18

- Analyze, build and test arguments to examine the impact of different pieces of evidence in an intuitive environment.
- Perform predictive, diagnostic, intercausal reasoning from evidence for Bayesian or non-Bayesian networks.
- Review hypothesis, variables, parameters, and structures of team members and create a final problem report. [[Link](#)]

MBS ANALYTICS DATATHON | MELBOURNE BUSINESS SCHOOL | JUL'18

- Predicted the oral health risk factors in Victoria for possible features including personas, regions and age groups.
- Included insights from 21 health-related datasets concentrating major causes and risk factors for bad oral health.
- Predicted oral claims identifying critical regions and amount spent on consumer products affecting oral health.
- Proposed solutions and an approximation model with possible improvements from contributing factors.

Achievement: Project was 2nd best student model and nominated to present at the Victorian health ministry. [[Report](#)]

DATA SCIENCE CHALLENGE | ERNST AND YOUNG, MELBOURNE | APR'18-MAY'18

- Predicted quality of life for different countries over the years 1993-2016 with 40 independent features.
- Data imputation for null values in over 30 variables with interpolation and K-means imputation methods.
- Recovered errors in Gaussian mixture and regression models with constrained K-means and XG boost.
- Data wrangling, feature engineering from AV-Plots and improved accuracy with iterative constrained K-means.
- Verified likelihood, eradicated fewer dependent variables with less feature dependency for more accurate predictions.

Achievement: Selected in top 5 for national final at EY DNA, Melbourne. [[Report](#)]

Additional certifications and Training

- **E-certifications:** Google cloud DE 1, React, Statistics, ML, Tableau, Power BI, Kubernetes and Docker
 - **Ongoing certifications:**, TensorFlow 2, Apache Kafka, Cloud Architect
 - Valid TFN and WWC card holder from Victorian government.
-

Skills & Abilities

- Valuable experiences in planning, organizing and prioritizing work to deliver on-time solutions.
 - Excellent written, presentation and interpersonal communications skills.
 - Skills in corporate finance, payable finance, retail analytics and blockchain supply chain.
 - Organized and mentored programming IOT workshops like Arduino programming for students.
 - Strong Conceptualizing and problem-solving skills.
 - Lead technological seminars on hardware programming and design.
-

Achievements & Interests

- Guinness world record holder for solving Rubik's cube with group.
 - Lead and mentored technological seminars on hardware programming and controller design.
 - Professional former cricket player for corporate national team.
 - **Interests:** Soccer, cricket, pop music, sitcoms, outdoor sports.
